

Please know that I am against the Localism campaign currently being considered by the FCC. National Radio is very important to the emotional and spiritual well-being of our family and many folks around these United States. We listen to K-Love Radio, Air-1, NPR and several other stations heard on FM translators almost 24/7. We feel in touch with others around the country and it has a unifying effect in these United States. This most certainly serves me as a member of the local community and is in the best of public interest. Please do not allow LPFM broadcasters to displace K-Love, Air-1 and other nation-wide radio stations. Doing so would be a great disservice to millions of us around the country that find these stations to serve a powerful uniting force in dangerous times. Sincerely, Jonathan Retzlaff, Teacher, AHS, Salinas, CA.
